## Work Experience

---

### Saving Dreamz Foundation Website

*Remote • Jan 2026 – April 2026*

- Worked with an NGO to understand client requirements and deliver a scalable digital platform aligned with organizational goals and user accessibility.
- Developed a secure full-stack web application with authentication and role-based access.
- Integrated REST APIs and database management for efficient data handling.
- Built responsive and scalable frontend interfaces with modern UI practices.
- Implemented backend validation, error handling, and optimized server performance.
- Followed modular architecture and clean coding standards for maintainability.

**Technologies/Skills:** Next.js, TypeScript, TailwindCSS, Axios, Node.js, Express.js, JOI, JWT, MongoDB

**Tools and Technologies:** VS Code, Google Antigravity, Postman, MongoDB Atlas

**Deployment:** [Main Website](#), [Admin Panel](#)

### Web Developer Intern - Swapple Solutions Pvt. Ltd.

*Remote • March 2025 – April 2025*

- Built a Website to enable online visibility and lead collection through forms, bookings, and inquiries.

**Technologies/Skills:** : HTML, CSS, JavaScript, Reactjs, TailwindCSS, Git.

**Tools and Technologies:** VS Code, Framer motion, Figma, Github.

**Deployment:** [Leadswap](#)

### Technical Member - GeeksforGeeks Campus Body, RBU

*On Campus • Aug 2025 – Present*

- Worked as a technical team member contributing to development initiatives, technical event coordination, and collaborative problem-solving activities within the campus community.
- Assisted in organizing coding events, technical workshops, and community-driven learning sessions
- Collaborated with team members on web development and technical project activities.
- Contributed to content creation, technical discussions, and peer learning initiatives.
- Participated in problem-solving sessions and strengthened knowledge of DSA, web technologies, and software development practices.
- Supported community engagement activities to encourage technical learning among students.

**Technologies/Skills:** Web Development, Git, Problem Solving, Team Collaboration, Event Coordination

**Tools and Technologies:** VS Code, GitHub, Postman, Discord, GeeksforGeeks Platform

## Personal Projects

---

### VidTube | Video Streaming Platform

- Developed a full-stack video streaming platform using the MERN stack.
- Implemented secure JWT authentication and user session management.
- Built video upload, watch history, likes, comments, and subscription features.
- Designed responsive UI with optimized API integration and state management.
- Structured, scalable backend architecture with MongoDB data modeling.

**Libraries/Frameworks:** React.js, TypeScript, TailwindCSS, Axios, Node.js, Express.js, JWT, MongoDB, Cloudinary.

**Tools and Technologies:** VS Code, Postman, MongoDB Atlas.

**Deployment:** [VidTube](#)

### Hawkins Heist | Web-based game

- Developed an interactive browser-based game during the GeeksforGeeks hackathon.
- Implemented gameplay mechanics, collision detection, and score tracking logic.
- Designed responsive and engaging UI for a smooth cross-device experience.
- Optimized frontend performance for seamless gameplay and fast rendering.
- Applied modular JavaScript architecture for maintainable game development.

**Libraries/Frameworks:** React.js, JavaScript, TailwindCSS, Axios, WebSocket, Node.js, Express.js, JWT, MongoDB.

**Tools and Technologies:** VS Code, Postman, MongoDB Atlas

**Deployment:** [Main Website](#)

## EDUCATION

---

### Ramdeobaba University

*Nagpur, IN • Aug 2024 - May 2028*

Bachelors in Technology | Computer Science and Engineering (AIML) *CGPA: 9.54/10*

Relevant Coursework: Data Structures and Algorithms; Full Stack Development

## SKILLS

---

**Technical Skills:** MongoDB, Express.js, Node.js, React, Next.js, TailwindCSS, TypeScript, JavaScript, RESTful API, GitHub, Cloudinary.

**Languages:** Fluent in English, Hindi, Marathi; Conversational Proficiency in Spanish.

**Certifications & Training:** Full Stack Developer(Udemy).
